CLASSIFIED - COALITION FORCES ONLY
XR-7 "SKY EYE" UAV RECONNAISSANCE SYSTEM
OPERATOR'S FIELD MANUAL
REVISION 4.2.1
=====
===

SECTION 1: SYSTEM OVERVIEW

The XR-7 "Sky Eye" provides real-time aerial surveillance with a sweep radius of 450 meters. Enemy positions are relayed to all friendly HUD systems via encrypted TAC-LINK channels.

SWEEP PATTERNS:

- Standard Sweep: 6-second interval, 360° coverage
- Focused Sweep: 2-second interval, 120° directional cone
- Overwatch Mode: Stationary 90° persistent scan

SECTION 2: THREAT CLASSIFICATION

ICON LEGEND:

- [▲] - Hostile Infantry (Red Diamond)
- [▲▲] - Armored Vehicle (Red Double Diamond)
- [■] - Enemy Killstreak Active (Flashing Red Square)
- [◆] - High Value Target (Gold Diamond - Priority Elimination)

SECTION 3: COUNTER-DETECTION

WARNING: Enemy operators may deploy the following countermeasures:

- CUAV "Scrambler" Drone: Degrades radar resolution by 60%
- EMP Field Generator: Complete system blackout for 15-30 seconds
- Ghost Perk Operatives: Invisible to standard sweeps
- Cold-Blooded Operatives: No thermal signature return

SECTION 4: ADVANCED OPERATOR TECHNIQUES

- Pulse-Canceling: Toggle radar on/off in 2-second intervals to avoid enemy CUAV triangulation while maintaining partial awareness
- Bait-Sweep: Activate UAV in known enemy territory, then reposition to ambush counter-UAV teams
- Overwatch Rotation: Coordinate with squad to maintain 100% radar uptime through sequential UAV deployment
